

Align with new standards - ISO/IEC 27001:2022

Enabling organizations to comply to the latest information security management system (ISMS) based on ISO/IEC 27001:2022

ISO/IEC 27001:2022 is introduced with radical changes to the ISMS framework and structure. With this, the earlier standards, i.e., ISO/IEC 27001:2013, ISO/IEC 27001:2013/Cor 1:2014 and ISO/IEC 27001:2013/Cor 2:2015 stands withdrawn. 10xDS is enabling organizations to be compliant as per the latest standards to be ready for future ISO certifications or recertifications.

Secure information in all forms, including paper-based, cloud-based and digital data

Increase resilience to cyber-attacks & Respond to evolving security threats

Provide a centrally managed framework that secures all information in one place

Ensure organization-wide protection, including against technology-based risks and other threats

Protect the integrity, confidentiality and availability of data

Reduce costs and spending on ineffective defence technology

How 10xDS helps in getting the organization compliant and audit ready

Gap analysis to map out and understand the differences between the current controls in place and the best practices according to ISO 27001

Devise plans to implement controls and create a timeline that shows when controls can be implemented along with tools required

Prioritizing the most relevant controls for each company and industry type to enable companies to focus on enhancing their security posture.

Support the IT and Security team in implementation of controls and integration of the organizations' security capabilities & ISMS
